production of such products. In addition, the Company engaged a single diligence provider to audit tin parts and minerals purchased by the Company to determine whether the chemical composition of such materials included any Conflict Minerals. As a result of this process, the Company determined that the only Conflict Mineral necessary to the functionality or production of certain of the Company's electrical steel grades, tinplate products and electrodeposition coating service for metal parts (collectively, the "Covered Products") manufactured during the Reporting Period was tin.

Following this determination, the Company conducted a detailed review of the ways in which tin entered the Company's supply chain and was used by the Company during the Reporting Period. This review established that the Company used tin in the production of its products (Zinc products).

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.
